FOREWORD

This booklet of trade statistics will acquaint the Ontario manufacturer with current opportunities to participate in the profitable United Kingdom market.

The U.K. is one of the world's great importing nations, ranking second to the U.S. in import value. U.K. annual imports are equal in value to more than twice Canada's exports to the entire world.

Part I of the booklet reports United Kingdom imports for the years 1962 and 1963 and the portion accounted for by exports from Canada. The data is compiled by the United Nations' Department of Economic and Social Affairs, based on information from the United Kingdom. These are the latest figures available at time of publication, and the system used is the Standard International Trade Classification (S.I.T.C.).

Part II of the booklet contains Dominion Bureau of Statistics data on Canadian exports to the U.K. of "end products inedible". This DBS classification covers fully manufactured products requiring no further fabrication before being put to use. This information from DBS is provided in greater detail than is available from the United Nations' material listed in Part I.

Part III is a representative list of fairs and exhibitions in the U.K. of interest to Canadian manufacturers.

In translating this information into an export program, the manufacturer is advised to use the varied services and background knowledge of the government agencies engaged in this specialized field.

The Ontario government government, through its Trade and Industry Branch in Toronto, maintains offices in London, England; Dusseldorf, West Germany; Milan, Italy; as well as Chicago and New York in the United States. The federal government, through its Department of Trade and Commerce, has many trade offices abroad, including London, Liverpool, Glasgow, and Belfast.
